Per(%) :- 88%

N.M. High School (X), Ahmedabad

Gujarat Secondary Education Board (SSC)

Year of completion :- 2017

Per(%) :- 85%

COURSES

web Development

Web Development is some-what a vague term used to describe the building or maintaining of web sites hosted on the internet. I use the word 'vague' because there's so many programming languages, frameworks and tools that are used for Web Development. Web Development could refer to a single web page built with HTML and CSS .

Python

Python is an interpreted high-level general-purpose programming language. Python's design philosophy emphasizes code readability with its notable use of significant indentation. Its language constructs as well as its object-oriented approach aim to help programmers write clear, logical code for small and large-scale projects.

Declaration

I, Vedant Modi, hereby declare that the information contained herein is true and correct to the best of my knowledge and belief. I aspire to develop my long-term career in well reputed web development & to contribute to the growth of the company.
